

T5 Metric Definitions

metric	definition	unit
valid fusion rate	matched valid fused detections divided by detector person detections	ratio
mean/median/P95 3D error	Euclidean error between fused person centre and GT 3D person centre	metres
error > 1m	fraction of matched valid fused detections with 3D error above 1 metre	ratio
FPS	approximate offline detector + fusion throughput reported by evaluator	frames/s
camera depth error	absolute difference along the camera optical depth axis	metres
